

## df.gateway: Digitálna rádiová brána pre BOS

The screenshot shows the TMG DR-GW web interface under the 'Df - Clients' section. The left sidebar includes links for Administration, Modulation, Träger, Alarman, TETRA Ressourcen, Audio Portal, Df-Clients, Profile, and Device Monitor. The main area displays a table of clients with columns: Benutzername, Profil, Mandant, Einzelruf, Gruppenruf, SDS, Status, and GPS. Below the table are input fields for 'Mandant', 'Profil', 'Benutzername', 'Passwort', and 'Parallelgruppenauswahl'. At the bottom are buttons for 'Hinzufügen', 'Aktualisieren', and 'Löschen'.

**df.gateway**:slúži na pripojenie riadiacich stredísk a komunikačných staníc do digitálnej siete BOS pomocou TETRA ústredne DXT3 od firmy Airbus Defence and Space. Komunikácia je End to End (E2EE) kryptovaná pomocou BSI kľúčov.

### Použité technológie:

ESXi, VMware, Windows 12 Server, SUSE Enterprise Linux, 4x E1 karta, MKK(viackanálová kryptokarta), SIP, RTP, HTTP, SOAP, XML, XNMP, jazyky C a Delphi
